QUICK SETUP GUIDE

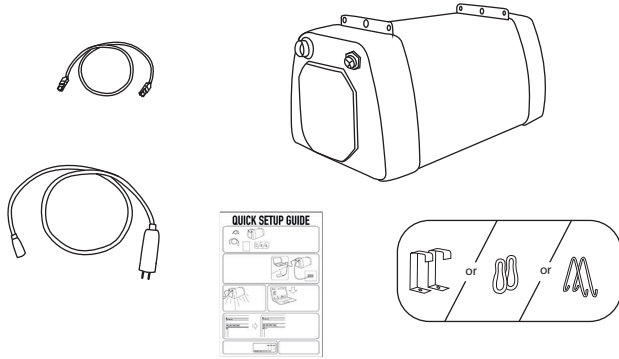

Make sure that you have recieved the following contents:
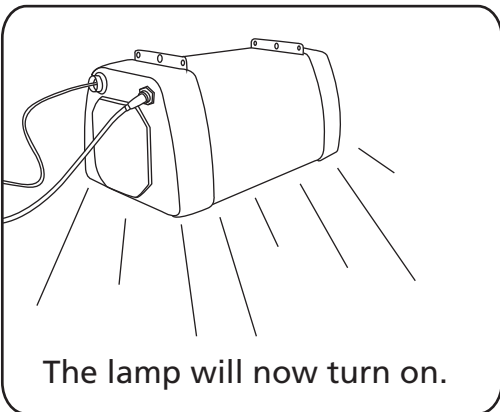

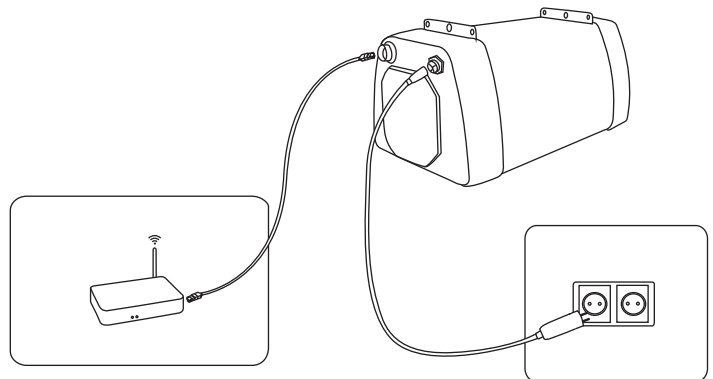

Heliospectra light system
Ethernet cable
Power cable
Quick Setup Guide
Chosen hanging attachments*
*if not otherwise specified, the v-hangers will be included

Then mount the lamp using the hangers.

Plug in the power cable to a power outlet socket and the Ethernet cable to a router.

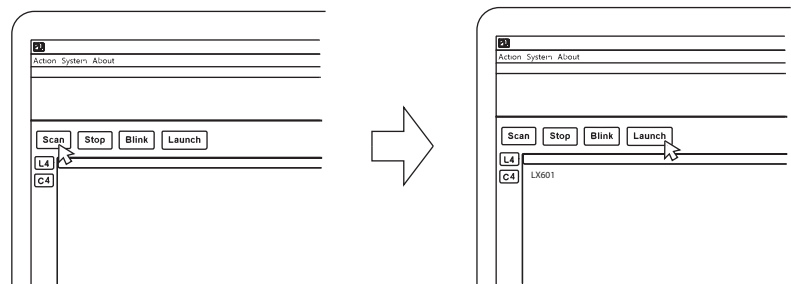

The lamp will now turn on.

Go to
www.heliospectra.com/getstarted
to download and install the
System Assistant software.

Here you can also find more detailed manuals, FAQs, support contact etc.

First make sure that your computer and router are on the same network.

Once the **System Assistant** is installed, start the program and click **Scan**. When the lamp has been found, click the **Launch** button.

The Web User Interface will now open in a web browser. Click the **Operation** tab and tick the **Real time update** box.

Add to schedule | Set now | ☑ Real time update | ◯ Lock ratio

Congratulations!
You can now create your own light recipes, set schedules and adjust intensities as you wish.
